

Computer Languages

name: _____

Task 1: Parsing human languages

1. Select two quotations from people you admire or find interesting. They should be between 4 and 12 words each, and cannot be more than a single sentence each.
2. Locate and write the quotes below. Then print them each in 100 point font. In your word processor, set the page orientation to landscape and make the margins small (like .25")

#	Quote text	Author	Statement type
1			
2			

Notes 1: Computer language categorization tree

Task 2: Language mini-research project

For your chosen language, complete the following with your partner:

Name of language:	Inventor and birth year:
Type of language (from tree):	Assembled, compiled, interpreted?
Name of official specification, if any:	Common uses (is it still in use today?):
Measurement of current "popularity" (include your source and how this is measured):	
Code of a simple program (such as a "hello world" or something slightly more interesting, like a variable assignment and mathematical operation):
