

CIT-115: Operating Systems Essentials

Crash Course OS Video: Mind-Storm

1. What was unique about the Atlas Super computer?	2. Describe best you can what is meant by "the operating system provides applications abstractions of common operations":
3. In what ways is an Operating System "just another application"? In what ways is an OS special or different from other applications?	4. By kernel, do we mean a special kind of corn?

5. As you watch the video, extract the core functions of an operating system and attach them to the central bubble:
