

Strip Survey Analysis:

Student Name:

Which survey subgroups within a SINGLE SURVEY exhibit the most difference between one another? Use numbers to support your answer?

Which survey subgroups across ALL SURVEYS exhibit the most difference? How can you make this claim?

Choose a strip survey in which you believe the outcomes are likely not at all generalizable to the CCAC student population at large. Which survey did you choose? Why not?

Which strip survey outcomes do you believe are likely to be the most generalizable to a non-student, adult sampling in Pittsburgh? Why?

Choose a strip survey that conveys a non-intuitive outcome and make a claim for why you would have expected a different outcome. What difference might you have expected?
